As previously disclosed in the Company's 8-K filed on February 9, 2005, a description of the Company's initial results for the fourth quarter and twelve-month periods ended December 31, 2004 follows. A copy of the draft financial statements is contained in the Company's 8-K filing.

Total revenues of Intevac for the quarter ended December 31, 2004 were \$10.3 million, compared to \$12.1 million in the fourth quarter of 2003. Equipment revenues, which included one 200 Lean system, were \$8.3 million, versus \$9.0 million in the fourth quarter last year. The decrease resulted from lower sales of spares and upgrades. Imaging revenues were \$2.0 million, down from \$3.1 million in the previous year, due to lower revenues from research and development contracts.

Net loss for the quarter was \$3.2 million, or \$0.16 per diluted share on 20.1 million weighted-average shares outstanding, compared to a net loss of \$601,000, or \$0.04 per diluted share on 15.2 million weighted-average shares, in the fourth quarter of 2003. The increase in net loss was primarily attributable to lower gross margins in the Equipment and Imaging business and lower net revenues in the Equipment business. Equipment margins were lowered by the 200 Lean system recognized for revenue, which was manufactured during the second quarter of 2004 when 200 Lean costs were high. Imaging margins were reduced by a cost-sharing program related to development of military head mounted night vision cameras. The number of shares outstanding rose primarily as a result of conversion of the Company's 6 1/2 % convertible notes due 2009 in November 2003 and the Company's secondary offering in February 2004.

Total revenues for the year were \$69.6 million, up from \$36.3 million in 2003. Equipment revenues were \$60.5 million, compared to \$26.7 million in the prior-year period. The increase was attributable primarily to higher sales of disk sputtering systems and components in 2004, which were partially offset by a reduction in sales from flat panel display manufacturing equipment. Imaging revenues were \$9.1 million, down from \$9.5 million in the prior-year period.

Net loss for the twelve months of 2004 narrowed to \$4.3 million, or \$0.22 per diluted share on 19.7 million weighted-average shares outstanding, from net losses of \$12.3 million, or \$0.95 per diluted share on 12.9 million weighted-average shares, for the same period in 2003. The improvement was primarily due to the large increase in equipment sales with only a slight increase in operating expenses. Also contributing was a reduction of interest expense due to conversion of the Company's 6 1/2 % convertible notes.

Order backlog totaled \$10.5 million on December 31, 2004, compared to \$16.2 million on September 25, 2004, and \$43.3 million on December 31, 2003. Year-end backlog does not include orders for three 200 Lean systems received early in 2005.
